

Casting the Digital Footprint

November 5-6, 2020 | Denver Area, CO | Classroom

Technology impacts almost every type of investigation today. Uncover the information technology users knowingly and unknowingly leave behind when accessing and using electronic devices. Learn how to covertly strengthen your investigations through gathering personal, public and open source data. Discuss techniques to locate evidence through technologies that can benefit any type of investigation.

\$295

About

Registration deadline is Friday, October 2, 2020.

This course is designed for investigators, detectives and patrol officers seeking general and more global resources to aide in all types investigations - not just technology investigations.

Past participants had this to say...

"I learned that several items around the house/crime scene may contain digital evidence that I had never considered."

"Very good information, I enjoyed the practical application and case studies."

"Excellent training—better than other digital classes I have taken in the past."

"Training was very current and relevant. The instructor is very experienced and knowledgeable!"

What's In It For You

Upon completion of this training, you will be able to:

- Understand the means by which a person leaves a digital "trail" for investigators on multiple digital devices
- Examine how to interpret reports of analyzed devices
- Apply practices in extracting device histories for investigations
- Identify methods to complete search warrants with open-source and social media providers

Is this training for you?

The following would benefit from this training:

- Court System Personnel
- Educator
- Law Enforcement
- Law Enforcement Support
- Prosecutors

Pre Training Detail

Another great training opportunity in Thornton, CO!

Mobile Device Investigations

Nov 2-4, 2020 | \$395

Learn current cell phone related strategies and techniques for any type of investigation. Explore and apply current practices for working with different cellular network providers, completing technology-focused search warrants, analyzing cellular provider call data, associating reported data to the investigation and effective case reporting strategies.

Instructors

Andrew Vallee Special Agent, Tennessee Bureau of Investigation (TBI)

Andrew Vallee is Special Agent with the Tennessee Bureau of Investigation. He is currently a sworn law enforcement officer assigned to the Technical Services Unit and specializes in digital forensics, cellular network analysis, WiFi analysis, and various other technology related disciplines. Prior to joining the TBI, Special Agent Vallee worked as a Detective with the Metro Nashville Police Department. He has worked in law enforcement for 18 years and has been a law enforcement instructor for over 12 years. He is currently appointed to the Scientific Working Group on Digital Evidence (SWGDE) and is a member of the American Academy of Forensic Science - Digital and Multimedia Section.

Edward Merritt Detective, Criminal Investigations Division, Hamilton County Sheriff's Office

Detective Merritt is a 22 year veteran with a law enforcement agency in South East Tennessee. He is currently assigned to the criminal investigations division where he primarily works cases involving internet crimes against children. In addition to his current assignment, he serves as a technical adviser to his department's hostage negotiations team and is the team leader for the sheriff's underwater recovery team (S.U.R.T.). He is a P.O.S.T. certified Child Abuse Instructor and has received training in Advanced Investigation and Prosecution of Child Abuse and Exploitation through the National Advocacy Center. Since 2008 he has attended training in Modern Internet Communications and Cell phone investigations from the FBI and a number of the nation's private vendors. He is a strong supporter of training in the proper seizure of mobile devices and hopes to one day see a national standard in testifying to cell site location information.
